EDUCATION

Bachelor of Science in Computer Science-The University of Texas at El Paso (UTEP) Anticipated: 05/2027
GPA: 3.44

Awards: AP® Scholar Award, UTEP **Honors** Program, SHPE scholarship
Technical Certifications: Google IT Support Specialist, AWS Cloud Computing Badge, Java IT Specialist Programming Certification.
Competitions: DELL Tech Academy 1st place out of 115 students, Great Minds in STEM Hackathon, **Bloomberg** Tech Lab, EPCC Datathon

EXPERIENCE/LEADERSHIP

Computer Science Technician –*University of Texas at El Paso* 2025- 2025

- Provided troubleshooting support for faculty, staff, and students in hardware and software.
- Assisted in system setup, configuration, maintenance, and inventory management. Helped with OS cloning and deployment.

DELL TECH ACADEMY *1st Place; University of Texas at El Paso* 2025

- Engineered real-world tech solutions in a fast-paced, industry-driven environment, collaborating with Dell Technologies professionals to design and present innovations that align with enterprise-grade IT standards. Demonstrated leadership and technical agility by delivering polished presentations and solutions to executives.

SECOND CHAIR CELLIST *Orquesta Sinfónica Esperanza Azteca* 2017-2025

- Performed at the Mexican Cultural Institute in Washington, D.C., and collaborated with the New Mexico State University. Social project to bridge the gap between education and cost.
- Developed strong multitasking, time management, and team skills by working efficiently under pressure.

PROJECTS

Sudoku Solver *Python*

- Built a terminal-based solver that uses backtracking algorithms to solve any valid Sudoku puzzle.
- Demonstrated strong problem-solving skills and applied recursive logic using Python.
- Strengthened understanding of algorithmic efficiency and debugging in constraint-based problems.

Security Scanner *Html, Css, Javascript*

- Developed a web-based interface that simulates scanning URLs for common web vulnerabilities.
- Practiced client-side scripting and improved understanding of secure front-end design.
- Gained experience in creating interactive UI components and simulating real-world cyber scenarios.

Home-lab *Cybersecurity*

- Added an AI for my home and more users internationally using **OpenWebUI** and **LM Studio**, installed **pi-hole** for wifi **adblocking** and **encryption**, made a 2000 printer work with wifi **AirPrint** and computer **printing**, and replaced google drive with **Nextcloud** and google photos with **Immich**. Besides this, I have also installed **Vaultwarden** for password management and other more in the name of independation from Big Tech. All of these services are checked if they are alive with **Uptime Kuma**.
